Preface vii

Committees viii

Photograph of delegates at Metal Forming *2002*, Kraków ix

Invited keynote papers

Applications and capabilities of explosive forming 1
D.J. Mynors, B. Zhang

Integration of CAD/CAM/CAE/RP for the development of metal forming process 26
D.Y. Yang, D.G. Ahn, C.H. Lee, C.H. Park, T.J. Kim

Microforming—from basic research to its realization 35
U. Engel, R. Eckstein

Numerical treatment of contact and friction in FE simulation of forming processes 45
J.-L. Chenot, L. Fourment, K. Mocellin

Through-process modelling of microstructure evolution in hot forming of steels. 53
M. Pietrzyk

Microstructure and anisotropy

Feasibility study of partial recrystallisation in multi-pass hot deformation process and application to calculation of mean flow stress 63
S. Choi, Y. Lee, P.D. Hodgson, J.S. Woo

Influence of Nb, V and Ti on peak strain of deformed austenite in Mo-based micro-alloyed steels 72
W. Sun, C. Lu, A. Kiet Tieu, Z. Jiang, X. Liu, G. Wang

Mechanical behaviour of hot and warm formed microalloyed steels 77
J. Majta, A. Bator

Modelling of plastic anisotropy in heat-treated aluminium extrusions 84
O.-G. Lademo, O.S. Hopperstad, K.A. Malo, K.O. Pedersen

Modelling the temperature distribution and microstructural changes during hot rod rolling of a low carbon steel 89
S. Serajzadeh, H. Mirbagheri, A. Karimi Taheri

Peculiarities of deformation and structure formation in nitrogen-containing steels of various structural kinds. 97
V.G. Prokoshkina, L.M. Kaputkina, Yu.I. Lojnikov

Preparation and microstructure of in situ particle reinforced titanium matrix alloy 103
E. Zhang, S. Zeng, B. Wang

Texture evolution during deep-drawing processes 110
L. Duchêne, A. Godinas, S. Cescotto, A.M. Habraken

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.

CONTENTS direct

This journal is part of **ContentsDirect**, the ***free*** alerting service which sends tables of contents by e-mail for Elsevier Science books and journals. You can register for **ContentsDirect** online at: **www.elsevier.com/locate/contentsdirect**

Elsevier Science B.V.

The deformation processing map for control of microstructure in CuAl9.2Fe3 aluminium bronze 119
Z. Gronostajski

The effect of cyclic torsion on the hot dynamic restoration of interstitial free steel in the austenitic range 125
I.P. Pinheiro, R.A.N.M. Barbosa, P.R. Cetlin

Material behaviour, constitutive laws and yield criteria

A dislocation density model for the simulation of hot forming processes 130
C. Sommitsch, V. Wieser, S. Kleber

An endochronic plasticity model for powder compaction processes 138
A. Bakhshiani, A.R. Khoei, M. Mofid

Experimental investigation on the viscoelastic properties of porous metals 144
B. Wang, D. Shu

Identification of rheological parameters on the basis of various types of plastometric tests 150
D. Szeliga, P. Matuszyk, R. Kuziak, M. Pietrzyk

Mechanical properties of tension levelled and skin passed steels 155
E.J. Hoggan, R.I. Scott, M.R. Barnett, P.D. Hodgson

Modelling the constitutive behaviour of thin metal sheet using strain gradient theory 164
J.-F. Michel, P. Picart

Numerical simulation of heat and mass transfer in fluidised bed heat treatment furnaces 170
W.M. Gao, L.X. Kong, P.D. Hodgson

Simulation of substructural strengthening in hot flat rolling 179
X. Duan, T. Sheppard

Structure and properties of nitrogen steels under hot deformation 188
L.M. Kaputkina, V.G. Prokoshkina, O.V. Kviat, H. Dyja, J. Siwka, J. Wiedermann

The effect of temperature on strain-rate sensitivity in high strength Al–Mg alloy sheet 193
E. Romhanji, M. Dudukovska, D. Glišić

Universal multi-objective function for optimising superplastic-damage constitutive equations 199
J. Lin, B.H. Cheong, X. Yao

Damage, defects, fracture and formability

A computational approach to blanking processes 206
M. Vaz Jr., J.D. Bressan

A more general model for forming limit diagrams prediction 213
M.C. Butuc, A. Barata da Rocha, J.J. Gracio, J. Ferreira Duarte

Application of self-annealing effect to the manufacturing of strips and wires showing high fatigue strength 219
A. Skołyszewski, M. Rumiński, F. Witek, M. Paćko

Experimental studies on bursting pressure of thin-walled flow formed pressure vessels 228
K.M. Rajan, P.U. Deshpande, K. Narasimhan

Extension of the forming limits in cold and warm forging by the FE based fracture analysis with the integrated damage model of effective stresses 235
A. Behrens, H. Just

Hot workability and models for flow stress of NIMONIC 115 Ni-base superalloy 242
C. Bruni, A. Forcellese, F. Gabrielli

Investigation of the morphology of internal defects in cross wedge rolling 248
Q. Li, M.R. Lovell, W. Slaughter, K. Tagavi

Microstructural inhomogeneity and biaxial stretching limits in aluminium alloy AA6016 258
M. Moore, P. Bate

Observations on fracture in axi-symmetric and three-dimensional cold upsetting of brass 267
V. Sljapic, P. Hartley, I. Pillinger

Stress corrosion cracking susceptibility of Al–Mg alloy sheet with high Mg content 275
M. Popović, E. Romhanji

The performance of Yld96 and BBC2000 yield functions in forming limit prediction 281
M.C. Butuc, D. Banabic, A. Barata da Rocha, J.J. Gracio, J. Ferreira Duarte, P. Jurco, D.S. Comsa

The self-excited waves of deformation localisation and limiting state criterion for Zr–Nb alloys 287
L.B. Zuev, T.M. Poletika, S.Y. Zavodchikov, A.F. Lositskiy, G.N. Narimanova, M.G. Shtutsa, V.I. Belov, O.V. Bocharov

Verification of the damage model of effective stresses in cold and warm forging operations by experimental testing and FE simulations 295
A. Behrens, H. Just

Sensitivity and stability evaluation of the deep drawing process 302
G. Gantar, K. Kuzman

Drawing and extrusion

Numerical and physical modelling of plastic deformation in 2-turn equal channel angular extrusion 309
A. Rosochowski, L. Olejnik

Strain distributions in plane strain deformation through wedge-shaped dies 317
M. Salimi

The evaluation of redundant deformation factors in axi-symmetric bar drawing of austenitic stainless steel 323
M.T.P. Aguilar, E.C.S. Corrêa, R.F. Silva, P.R. Cetlin

Warm forming of acid resistant steel wires used for manufacturing of springs 326
A. Skołyszewski, M. Paćko, J. Łuksza, M. Rumiński

Forging

Analytical, numerical and experimental analyses of the closed-die forging 334
F. Fereshteh-Saniee, M. Jaafari

Cold forming of bolts without thermal treatment 341
L. Janíček, J. Petruška, B. Maroš, S. Rusz

Die shape compensation in hot forging of titanium aerofoil sections 347
H. Ou, C.G. Armstrong

Parametric sensitivity analyses for FEA of hot steel forging 353
G. Snape, S. Clift, A. Bramley

Simulation of the fastener manufacturing process 361
D. Petrescu, S.C. Savage, P.D. Hodgson

Friction, lubrication and surface phenomena

A theoretical and experimental study of friction in metal forming by the use of the forward extrusion process 369
M. Bakhshi-Jooybari

Application of wheat flour lubricants to the press-forming process 375
H. Yoshimura, S. Torikai, T. Nishihara, T. Nonishi, N. Inouchi

Effects of surface-topography directionality and lubrication condition on frictional behaviour during plastic deformation 379
W. Rasp, C.M. Wichern

Finite element modelling of the inertia friction welding process between dissimilar materials 387
L. D'Alvise, E. Massoni, S.J. Walløe

Friction inhomogeneities in cold rolling 392
H. Pawelski

Measurement of oxide properties for numerical evaluation of their failure under hot rolling conditions 398
M. Krzyzanowski, J.H. Beynon

Numerical simulation of lubricated contact in rolling processes 405
R. Boman, J.-P. Ponthot

On possibilities for the determination of the coefficient of friction in hydroforming of tubes 412
F. Vollertsen, M. Plancak

Study on compression forming of a rotating disk considering hybrid friction 421
M.N. Huang, G.Y. Tzou

Artificial intelligence and CAD

Automatic inspection of metallic surface defects using genetic algorithms 427
H. Zheng, L.X. Kong, S. Nahavandi

Comparison of analytical methods and AI tools for material characterisation in hot forming 434
R. Di Lorenzo, L. Fratini, L. Filice, F. Micari, S. Bruschi

Development of a combination punch speed and blank-holder fuzzy control system for the deep-drawing process 440
K. Manabe, H. Koyama, S. Yoshihara, T. Yagami

Feature extraction from STEP (ISO 10303) CAD drawing files for metalforming process selection in an integrated design system 446
P. Holland, P.M. Standring, H. Long, D.J. Mynors

Forming feature representation and process selection in cold extrusion 456
H. Long, D.J. Mynors, P. Holland, P.M. Standring

On-line tool condition monitoring and control system in forging processes 464
L.X. Kong, S. Nahavandi

Novel materials and processes

A study of the manufacturing of tie-rod ends with casting/forging process. 471
H.R. Kim, M.G. Seo, W.B. Bae

Application of resistance heating technique to mushy state forming of aluminium alloy 477
S. Maki, Y. Harada, K.-i. Mori, H. Makino

Bearing materials obtained by recycling of aluminium and aluminium bronze chips 483
J. Gronostajski, W. Chmura, Z. Gronostajski

Consolidation of metal powders during the extrusion process. 491
M. Galanty, P. Kazanowski, P. Kansuwan, W.Z. Misiolek

Development of micro-piercing system with punch-damage monitoring function 497
I. Aoki, M. Sasada, T. Higuchi, T. Yano

Effect of heat treatment of preform on the mechanical properties of flow formed AISI 4130 Steel Tubes—a theoretical and experimental assessment 503
K.M. Rajan, P.U. Deshpande, K. Narasimhan

Finite element analysis and experiments of milli-part forming of strip bending using grain element 512
T.W. Ku, D.J. Kim, B.S. Kang

Improving mould design and injection parameters in metal injection moulding by accurate 3D finite element simulation 518
T. Barrière, J.C. Gelin, B. Liu

Lining of light metals with hard powders using shot peening 525
Y. Harada, K.-i. Mori, S. Maki

New materials and production technologies for innovative lightweight constructions. 532
M. Merklein, M. Geiger

Numerical and experimental investigation of glass–epoxy composite used in metal forming tool design 537
A. Kocov, J. Lazarev, D. Spaseska

The effect of vibration on surface finish for semisolid and cast components 543
M.T. Alonso Rasgado, K. Davey

Validation of In718 SPF and DB processes for the design of aircraft engine parts 549
A. Mugarra, K. Ostolaza, J.L. Alcaraz

Numerical methods

A National Centre for Metalforming Simulation in the UK 555
D.J. Mynors, R. Anderson, A. Richardson, R.G. Snape, P.M. Standring

Application of optimal design and control strategies to the forming of thin walled metallic components 565
J.C. Gelin, C. Labergere

Computational modelling of metal extrusion and forging processes. 573
A.J. Williams, T.N. Croft, M. Cross

Contact modeling in forging simulation. 583
B. Boroomand, J. Parvizian, A.R. Pishevar

Correction of hydrostatic pressure obtained by the finite element flow formulation using moving least squares method 588
H. Hashemolhosseini, H. Dalayeli, M. Farzin

Estimation of constitutive parameters using an inverse method coupled to a 3D finite element software 594
R. Forestier, E. Massoni, Y. Chastel

PCS_SUT: a finite element software for simulation of powder forming processes. 602
A.R. Khoei

Simulation of tensile test by node separation method 608
K. Komori

Ring rolling

Elastic–plastic finite element analysis of cold ring rolling process 613
H. Utsunomiya, Y. Saito, T. Shinoda, I. Takasu

The practicalities of ring rolling simulation for profiled rings. 619
K. Davey, M.J. Ward

Roll forming

Determination of buckling limit of strain in cold roll forming by the finite element analysis 626
M. Farzin, M. Salmani Tehrani, E. Shameli

Numerical analysis of cold roll forming of symmetrical open sections 633
M. Tajdari, M. Farzin

Rolling

A 3D finite element analysis of the hot rolling of strip with lubrication 638
A.K. Tieu, Z.Y. Jiang, C. Lu

A design of a third-order CVC roll profile. 645
C. Lu, A. Kiet Tieu, Z. Jiang

A three-dimensional thermo-mechanical finite element model of complex strip rolling considering sticking and slipping friction. 649
Z.Y. Jiang, A.K. Tieu, C. Lu, W.H. Sun

An experimental investigation of steel surface characteristic transfer by cold rolling. 657
B. Ma, A.K. Tieu, C. Lu, Z. Jiang

Analytical approach to the cold-and-hot bond rolling of sandwich sheet with outer hard and inner soft layers 664
G.Y. Tzou, A.K. Tieu, M.N. Huang, C.Y. Lin, E.Y. Wu

Determination of bending actuators set points to control crown and flatness in hot rolling of strip 670
M. Salimi, M.R. Forouzan

Integrated model for thermo-mechanical controlled process in rod (or bar) rolling 678
Y. Lee, S. Choi, P.D. Hodgson

Mathematical modelling of the stress–strain state in asymmetric flattening of metal band 689
A. Pesin, V. Salganik, E. Trahtengertz, M. Cherniahovsky, V. Rudakov

Mathematical modelling of roll load and deformation in a four-high strip mill. 695
V. Salganik

Optimal cooling of rolls in hot rolling. 700
M. Raudensky, J. Horsky, M. Pohanka

Simulation of the deformation of strip between stands during the process of rolling with a loop 706
H. Dyja, L. Lesik, P. Szota

Stabilisation of mechanical properties of the wire by roller straightening. 711
M. Nastran, K. Kuzman

Surface defects—evolution and behaviour from cast slab to coated strip 720
S. Moir, J. Preston

The influence of the deformation mode on the final mechanical properties of products in multi-pass drawing and flat rolling . . . 725
J. Łuksza, M. Burdek

Theoretical and experimental analysis of stress and temperature distributions during the process of rolling bimetallic rods 731
H. Dyja, L. Lesik, A. Milenin, S. Mroz

Plate bending, sheet forming, stretching and drawing

A combined temporal tracking and stereo-correlation technique for accurate measurement of 3D displacements: application to sheet metal forming 736
D. Garcia, J.J. Orteu, L. Penazzi

An algorithm for determining the optimal blank shape for the deep drawing of aluminum cups. 743
V. Pegada, Y. Chun, S. Santhanam

Analysis of simultaneous sheet metal forming operations using elastomer technique 751
H.A. Al-Qureshi

Effect of in-plane biaxial strain paths on the variation of normal anisotropy and texture of steel sheet 756
H.V. Vankudre, P.P. Date, I. Samajdar, S.K. Yerra

Experimental and numerical study of reverse re-drawing of anisotropic sheet metals 764
S. Thuillier, P.Y. Manach, L.F. Menezes, M.C. Oliveira

FE simulation of rectangular box forming using material characteristics from the multi-dome forming test 772
A.-W. El-Morsy, K.-i. Manabe

Finite element approach in the plate bending process 778
M. Math, B. Grizelj

Finite element simulation of springback in sheet metal forming 785
L. Papeleux, J.-P. Ponthot

Optimisation of the distribution of wall thickness in the multistage sheet metal forming of wheel disks 792
Y. Abe, K. Mori, O. Ebihara

Towards standard benchmarks and reference data for validation and improvement of numerical simulation in sheet metal forming 798
A.D. Santos, J. Ferreira Duarte, A. Reis, A. Barata da Rocha, L. Menezes, M. Oliveira, A. Col, T. Ono

Zinc-alloys as tool materials in short-run sheet-metal forming processes. Experimental analysis of three different zinc-alloys . . . 806
A. Nilsson, P. Gabrielson, J.-E. Ståhl

Tube and pipe forming

3D elastic–plastic finite element simulation of cold pilgering of zircaloy tubes 814
P. Montmitonnet, R. Logé, M. Hamery, Y. Chastel, J.-L. Doudoux, J.-L. Aubin

Analysis and finite element simulation of the tube bulge hydroforming process 821
Y.-M. Hwang, Y.-K. Lin

Elastic–plastic theory for initial buckling load of thin-walled grooved tubes under axial compression 826
G.H. Daneshi, S.J. Hosseinipour

FE simulations of the crushing of circular tubes into triangular cross-sections 833
Y.-M. Hwang, T. Altan

Implementation of backward tracing scheme of the FEM for design of initial tubular blank in hydroforming 839
J. Kim, B.-S. Kang

Influence of material and process parameters on the development of necking and bursting in flange and tube hydroforming 849
N. Boudeau, A. Lejeune, J.C. Gelin

Optimisation of processing routes for cross rolling and spin extrusion 856
R. Neugebauer, R. Glass, M. Kolbe, M. Hoffmann
